"Spooks" Have Approved, So Sir Oliver Moves

Cassel, Germany, Oct. 25.—(By the way) have approved, and Sir Oliver Lodge is about to move into his new house in Wittham.

Sir Oliver had all plans made to live in a certain house in Wittham, but a communication from the spirit world advised Lady Lodge that the house had better be sold.

First to Use 'Merchies.

The empress Josephine, it is said, was the first to use a pocket handkerchief in public. Her teeth were bad, and she, therefore, covered the defect by holding a costly handkerchief before her lips.

Keep Them On Clean Soil.

Of course, the best way to keep the chicks on clean soil is to keep them on clean soil at all times. If they develop the disease, move them immediately to clean pastures where the soil is plentiful. Spread lime heavily over infested areas and place expellants in order to destroy any worm present.

Constant Headache and Much Soreness and Pain Nearly Got the Best of This Harrisburg Lady, But Cardui Made Her Well and Strong.

Harrisburg, Ark.—Mrs. J. M. Nodden, living near here, states: "When I began working on me I suffered a great deal. I had so much soreness and pain in the lower part of my body I could hardly get up when I was down. I would have severe pains all across my back, and my sides hurt me all the time. I would have headaches constantly, especially the back of my head and neck. I was almost discouraged with my condition when I thought of Cardui, and decided to see what it would do."

I saw an improvement at once after the first bottle. I kept it up and the result was wonderful. I took altogether four bottles. I grew stronger, better appetite, less pain until I was well. I think Cardui is a God-send to suffering women and certainly can praise it, and so can I."

For more than 40 years Cardui has been in general use and in that time thousands have written to tell us how it helped them back to health and strength.

## CHILE ORDERS CRUISER NORTH

Action Taken to Prevent Trouble on Peruvian Frontier.

Santiago, Chile, Oct. 27.—The Chilean cruiser Esmeralda sailed northward yesterday and other units of the Chilean fleet are being prepared for sea duty. It is rumored they will follow the Esmeralda. This step on the part of Chile follows incessant reports of a probable revolution in Peru and information that the Peruvian government is making military preparations in the southern part of that country for the alleged purpose of diverting popular attention from the revolt which is said to be impending.

Northern Lights, Seen For Miles, Starle Boston

Boston, Mass., Oct. 25.—Contrasting sharply with the dark sky, the northern lights, seen clearly for miles by Greater Boston residents, attracted considerable attention in their first visit here in months. The lights, giving the impression of a giant rainbow, made their appearance across the heavens, were startling in their effect and could be seen for miles.

MAKING A SICK BIRD WELL.

It becomes sick is difficult. Safety first for the flock necessitates scrupulous care not to expose the birds unnecessarily to the elements, which means which make for bad health.

The Four Worst Maladies.

Gapes, roup, chicken pox, and scaly leg are the four worst maladies of the fowl. Annually these pesky diseases invade flocks and effect heavy mortality. These four diseases are caused by bacteria and viruses which are everywhere. They may be recognized by the fact that they cause the birds to become weak and listless, and they cause the birds to become weak and listless.

## Keep Disease From Fowl In Winter's Confinement

Flock Which Escapes Ravages of Gapes, Roup, Chicken Pox, and Scaly Leg Is Best Producer of Eggs and Meat, as Well as Dividends.

DISEASE is difficult to control among flocks of poultry because fowls are housed together in relatively large numbers and when disease develops the comparatively low value of each bird does not justify special care and attention for each individual hen. Hence, it is essential to protect the flock against the entrance of disease-causing organisms in a healthy condition. Chickens will not grow properly while mature fowls will rapidly lose their vigor and vitality and become unproductive and unprofitable. Prevention against disease is simple; attempt to cure a bird after
